- Consulting

"The process of applying to Medicaid is frightful for any family. From the application to approval to renewal – AMR Care Group was there for me. The knowledge and support that was given to me was priceless."

ROCHELLE C.

"On a scale of one to ten, AMR Care Group would be a 15. They're far and away the most professional and responsive agency in New York. Our family is grateful for the knowledge that our mother is safe and well cared for, thanks not only to her companions, but to the entire AMR team."

STEPHANIE N.

Personalized Care
with a Compassionate Touch

Compassion, Communication, and Connection...The three Cs of professional care.

AMR Care Group, your aging experts since 2003, provides comprehensive, customer-oriented care for those in the aging process and adults with physical or cognitive disabilities. Led by a licensed social worker, we maintain the highest standards in care management and companion services, always acting with integrity and respect for the dignity of our clients and their families. The key to our success isn't just one philosophy or approach. Instead, it lies in the way we care for every client and their family, meeting their unique needs and supporting their goals.

Clients in the aging process or who have cognitive and/or physical disabilities due to Alzheimer's disease, Parkinson's disease, or from a stroke receive services that are compatible with their needs. We are trained to care for these individuals who require a more specialized level of attention.

Care Management at its Best

Everyone's story is unique and our experts provide the support your loved one needs to thrive. Our care managers are licensed master social workers with years of experience and a wealth of knowledge. Using a holistic approach, we ensure your loved one's medical, social, emotional, financial and legal needs are being met by providing the following (and much more):

- Monitoring clients on a regular basis
- Advocating for highest quality of care
- Coordinating medical appointments, medications, and social activities
- Recommending interventions that stay ahead of the aging curve to lower risk of hospitalization or falls

"AMR Care Group has such amazing people working for them. Each and every employee that I worked with were all so compassionate and caring. I only hope all elderly people and family members would feel the compassion that we did. All of AMR people went above and beyond and it meant the world to me."

PAULA M.

Peace of Mind is so Important

Whether it's a noticeable decline or an emergency, our care managers are ready to guide families to the appropriate care. We help clients achieve their goals while allowing families to tend to their own personal responsibilities.

A Built in Safety Net

AMR Care Group's "Just Checking Program" allows those who are aging well to have a safety net. Our care managers visit on a monthly basis in addition to check-in phone calls. This allows us to get to know our clients and look for any subtle physical or cognitive changes. And we are always available for any emergencies.

Cultured Companions®

There's no reason your loved ones need to miss out on cultural activities, such as Broadway shows or a visit to a museum. Our specially trained cultured companions come from the entertainment world and will engage them in a magical adventure! From the home, to the last curtain call, it's a memorable experience for all.

We All Need Companionship

Research shows that social contact may be as effective as physical activity in improving mood and quality of life. AMR Care Group's non-medical companions provide a wide range of services including:

- Meal preparation
- Medication monitoring
- Accompany to medical appointments and outings
- Light housekeeping
- Social activities
- Supervising activities of daily living

Our companions are screened, drug-tested and trained. This service can be combined with care management or as a stand-alone service. Our companions receive ongoing training, including dementia and Alzheimer's care. They also provide the crucial socialization and safety supervision that seniors with disabilities often require.
